PASSION DRIVEN  
**PRECISION**

# WHO WE ARE

- At Royal Anchors, we started with a simple vision that has grown into becoming one of India's foremost names in Anchor Foundation bolts and custom construction fasteners. With a cutting-edge manufacturing facility and an expert team, we produce a remarkable 200 metric tons of precision fasteners monthly.
- Our guiding principle, Passion Driven Precision, fuels our commitment to quality and on-time delivery. We're here to provide an exceptional experience for our clients, offering everything from Anchor Foundation Bolts to Sag Rods, Brace Rods, and Connection Fasteners. Count on Royal Anchors for expertise, innovation, and reliability in every product.

# WHAT WE DO

We manufacture large, non-standard anchor bolts and construction fasteners. Our bolt manufacturing facility comprises of welding and plate fabrication equipments, and a warehouse stocked with standard connection fasteners.

# WHY CHOOSE US

## PROMPTNESS

Our primary goal is supplying on time, and our rapid supply eliminates your labour costs.

## QUALITY

Our products are of the highest calibre and are offered in sufficient numbers.

## STOCK AVAILABILITY

For speedier supply, MS and Alloy steel (Gr. En8D, En19) raw materials have been fully stocked from M12 dia to M64 dia.

## COMPETITIVE

We are committed to offering quality goods in a timely manner at fair pricing. Hence, assist clients in lowering project expenses.

## MISSION STATEMENT

*At Royal Anchors, we adhere to the philosophy that quality should be at the core of all corporate operations because it is essential to an industry's health.*

# QUALITY AND POLICY

Quality is of utmost importance to us, we are committed to constant improvement across the board to help us achieve our goal of complete client satisfaction. We have created a thorough quality assurance system that enables our business to satisfy all of the requirements of ISO 9001:2015 Quality Management System standard.

- Quality is every one's responsibility
- Customer satisfaction
- Timely delivery to our customers
- Measurable quality objectives
- Improving manufacturing processes
- Enhancing the competency and skills of our employees through training and development

# INDUSTRIES

WE SERVE & PRODUCTS USED

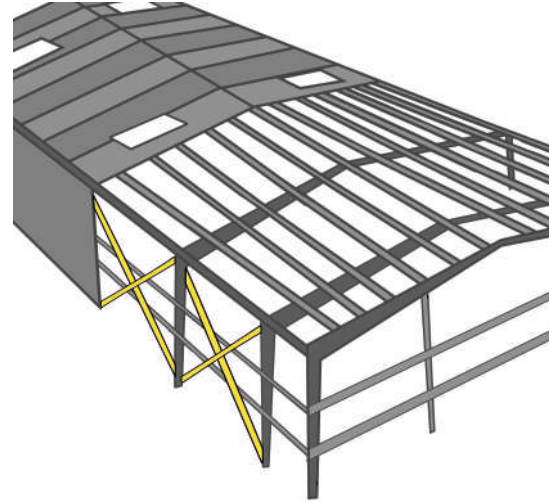

## PRE ENGINEERED BUILDING SYSTEMS

---

We manufacture custom L, J, bend foundation bolts from M12 – M80 diameter to virtually any specification required. These bolts are provided in either plain finish or hot-dip galvanized. All bolts are manufactured in grades, Gr 4.6, Gr 8.8, Gr 10.9.

Sag rods are manufactured in different specifications, finish & sizes as per customer requirement. The configuration consists of single rods with threading at both ends.

As brace rods are normally longer, Royal Anchor uses two rods joined together by a connector and finished with threads on each end. A connector is put together between the two rods for this assembly, and by spinning the connector, the assembly is tightened.

In cross bracing applications, hillside washers are utilized to distribute load uniformly. In the construction of metal buildings, diagonal brace rods are widely employed to support steel beams and wall columns. A nut may be tightened at different angles thanks to the curved surface. This expedites installation and minimizes field adjustments. Hillside washers are stocked at Royal Anchors: M16, M20, M24, M32 in self finish.

## MATERIAL USED

- Foundation Bolts
- Sag Rods
- Brace Rods
- Connectors
- Hill Side Washer
- Connection Fasteners

# CONNECTION FASTENERS

ROYAL ANCHORS

ISO 9001:2015

CERTIFIED COMPANY

## ELITE CONNECTION FASTENERS FOR PEB

**ROYAL ANCHORS UNVEILS ITS PREMIER LINE OF CONNECTION FASTENERS IN GR 4.6 AND GR 8.8 AS PER DIN 933 IS : 1364 (PART 1, 2)**

**WHY OPT FOR ROYAL ANCHORS FOR YOUR CONNECTION FASTENERS?**

- As specialists in the PEB (Pre-Engineered Building) range, we offer a comprehensive selection of fasteners-from Anchor Bolts, Sag Rods, and Bracing Rods to Connection Fasteners in grades 4.6, Gr 8.8 & Gr 10.9 with over 70 years of expertise in the industry
- Royal Anchors guarantees flawless fastening solutions and prevents shortages by maintaining a complete inventory of connection fasteners, including nuts and washers for purlins, columns & rafter joints.
- Our fasteners are electroplated and assembled, available in both Gr 4.6, Gr 8.8 & Gr 10.9 standards, ensuring dependable and efficient installations.
- Distinctively Labeled and Tagged.
- Each lot comes with a separate packing slip.
- Experience Signature Royal Anchors Service.

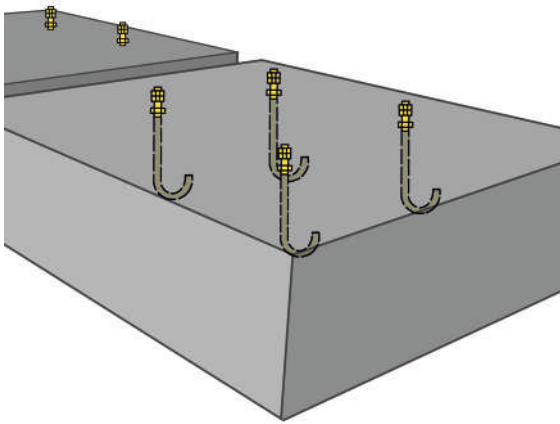

## PRE CAST CONCRETE STRUCTURES

---

The precast foundation is a reinforced concrete element consisting of a tied rebar cage incorporated in a semi - precast concrete element with foundation / anchor bolts which serves as formwork.

The precast foundation can be produced in different shapes and dimensions to meet every design and structural requirement.

## MATERIAL USED

- Foundation Bolts

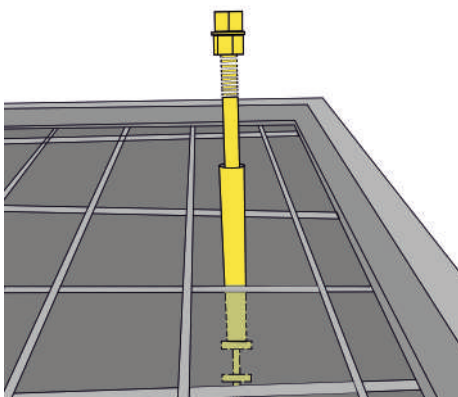

## CHEMICAL PLANTS

---

We produce a highly engineered selection of fastener assemblies designed especially for demanding petrochemical and processing industry applications. Our product line comprises of hexagonal nuts that meet IS/DIN/ASTM specifications as well as all material grades. We can accommodate all material grades used in the petrochemical industry. Materials generally available are released to both ASTM and IS.

STANDARD FINISHES : Zinc plating, Hot dip Galvanizing

## MATERIAL USED

- Pipe Stiffener Bolts

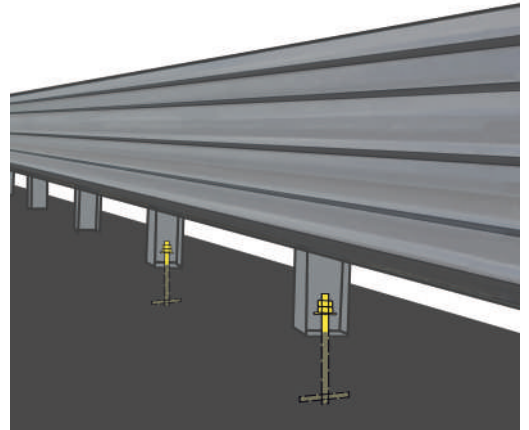

# BEAM CRASH BARRIER

## MATERIAL USED

- Foundation Bolts
- Connection Fasteners

The corrugated safety barrier post sections are connected into the ground using foundation bolts. These bolts are generally hot dip galvanized. We provide these bolts as per consumer requirements with desired finish.

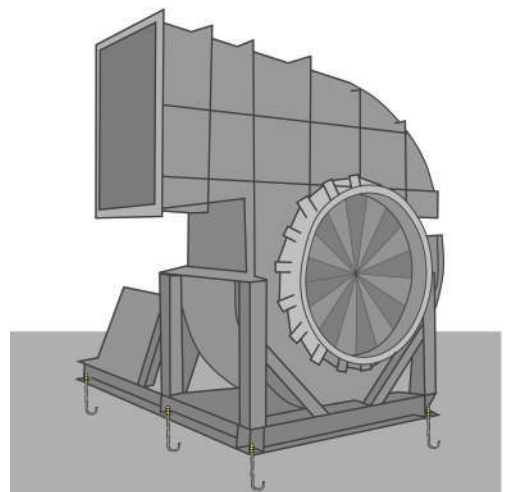

## INDUSTRIAL HEAVY DUTY FAN

We produce foundation bolts for axis fans, also known as industrial heavy duty fans and centrifugal fans. Large industrial fans are supported by light strength galvanized foundation bolts, which offer the appropriate mechanical characteristics. The transmission of the static and dynamic loads to the equipment foundation is ensured by this support.

## MATERIAL USED

- J TYPE BOLTS

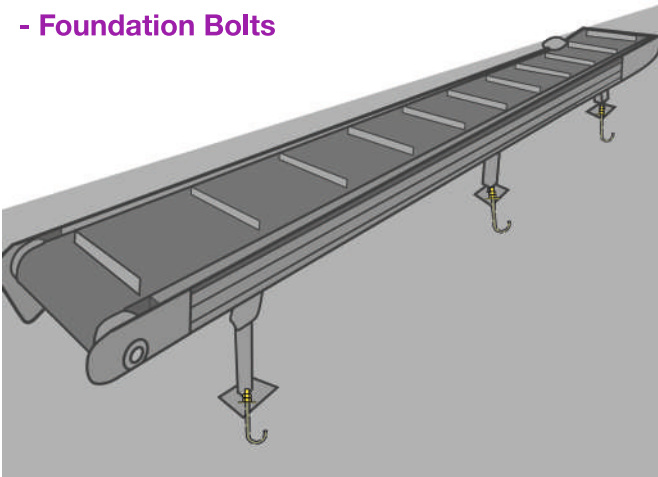

## MATERIAL HANDLING **CONVEYOR BELTS**

We manufacture custom L, J bend foundation bolts for conveyor belts industry. These are used in foundation of the pillars on which conveyors run.

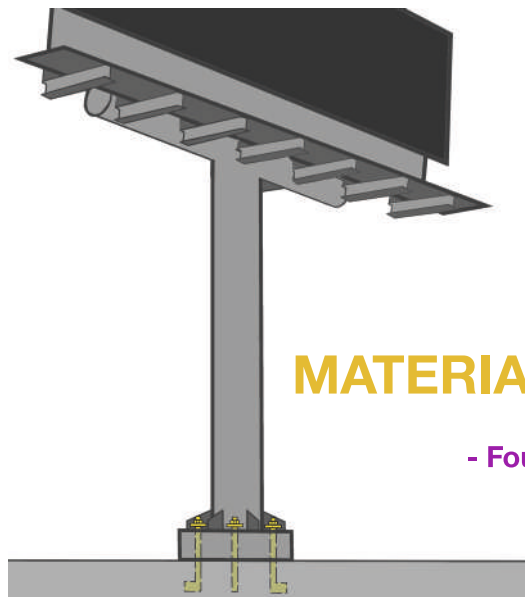

### MATERIAL USED

- Foundation Bolts

## STRUCTURAL **HOARDINGS**

Foundation bolts, also known as anchor bolts or bed bolts, are embedded in concrete foundations to support structural steel columns

### MATERIAL USED

- Foundation Bolts

## STREET & DOMESTIC LAMP POSTS

Luminaire pole structures include home lamp poles, height mast poles, and street lamp poles. To prevent pole deterioration, it is crucial to do a proper installation and use top-notch foundation bolts.

## MATERIAL USED

- Foundation Bolts
